

SDF550 Lab disperser

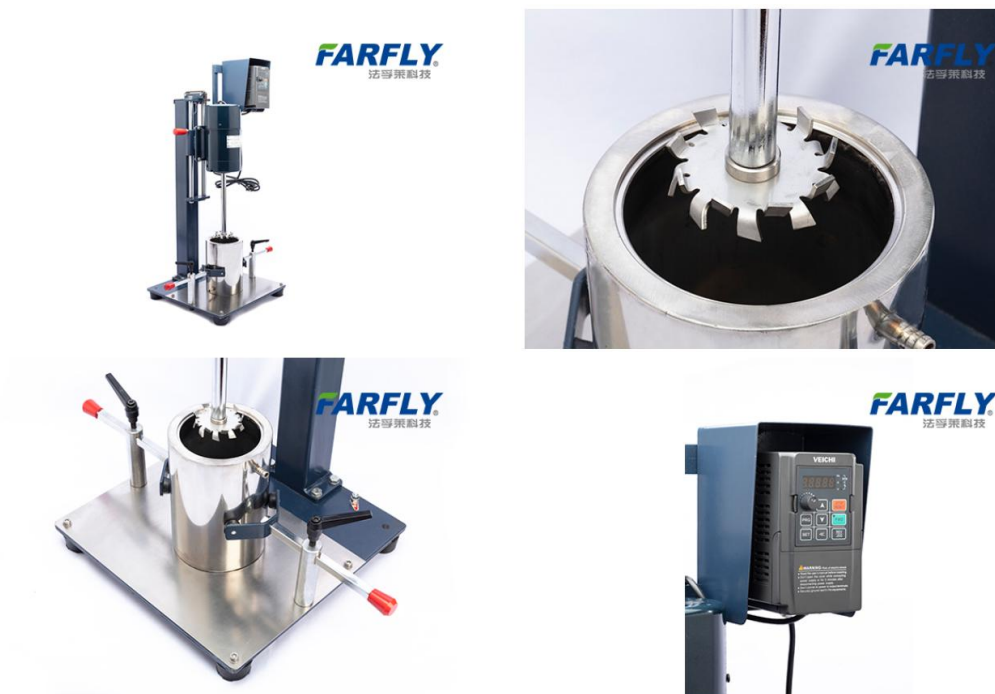

Characteristics

- New driving permanent magnet DC motor, no carbon brush consumption.
- Small size, large torque, high efficiency, low energy consumption, low noise, no reversing spark interference and linear speed-governing.
- Stepless speed regulation, PLD control technology, four LED digital tube display the speed of motor directly, dispersing and grinding together.

Technical parameters:

1. Power: 0.55kw, 220V, single phase, normal non-explosion motor
2. Handling capacity: 1-2L,
3. Speed: 200-8000rpm,
4. Contacting material: SS304;
5. Disperser: diameter 40mm and 50mm,
6. Lifting height: 300mm.
7. Size: 450*500*800mm,

COMPANY DETAILS:

FARFLY was founded in 2003 with a registered capital of 10 million RMB. The headquarter is located in International Plaza of Hongqiao Business District in Shanghai. Production factory is located in Jiangsu Wuxi Gushan Industrial Park, which covering an area of over 18,000 square meters. We are the professional chemical manufacturer and exporting to over 80 countries, providing more than 10,000 equipment to all over the world.
